

Volume 01 - Master Vision

Version v1 draft

README.md

Volume 01 - Master Vision

Version: v1 draft

Status: Draft

Document ID: MAL-V01-README

Purpose

Volume 01 translates the enterprise constitution into a master product and business vision. It explains what Mariam should become, which objectives matter, how AI strategy supports the platform, and how business, freelance, remote work, marketplace, knowledge, DNA, and expansion strategies fit together.

Scope

This volume covers strategic direction only. It does not define implementation architecture, sprint plans, or detailed specifications.

Principles

- Strategy must translate constitutional intent into product direction.
- Vision documents should be specific enough to guide roadmap choices.
- Strategic expansion must preserve Mariam's enterprise OS identity.

Operating Rules

- Use this volume before committing roadmap themes.
- Keep strategy independent from temporary implementation choices.
- Revise strategy only when the constitutional baseline or market assumptions materially change.

Documents

- book-01-01-executive-vision.md
- book-01-02-enterprise-objectives.md
- book-01-03-ai-strategy.md
- book-01-04-business-domains.md
- book-01-05-freelance-ecosystem.md
- book-01-06-remote-work-ecosystem.md
- book-01-07-marketplace-strategy.md
- book-01-08-knowledge-strategy.md
- book-01-09-dna-strategy.md
- book-01-10-future-expansion.md

Acceptance Criteria

- Every strategy book traces to Volume 00.
- Strategic objectives are concrete enough to inform roadmap planning.
- No strategy requires implementation in the system repository during this documentation phase.

Version History

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial Volume 01 strategy baseline.

Book 01-01 - Executive Vision

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B001

Purpose

Present the executive-level destination for Mariam AI Enterprise OS.

Scope

Covers leadership narrative, enterprise value, platform ambition, and decision framing.

Principles

- Mariam is positioned as an operating layer for AI-enabled work.
- Executive value comes from governance, speed, memory, and measurable execution.
- The vision must be understandable to business and technical leaders.

Operating Rules

- Use this book to align roadmap themes with executive outcomes.
- Avoid describing Mariam as only a productivity assistant.
- Keep strategic claims tied to governable capabilities.

Acceptance Criteria

- The executive vision can be summarized for stakeholders.
- The vision traces to MAL-V00-B001, MAL-V00-B002, and MAL-V00-B015.
- Roadmap planning can derive major themes from this document.

Book 01-02 - Enterprise Objectives

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B002

Purpose

Define measurable objectives for enterprise adoption and value creation.

Scope

Covers organizational control, productivity, auditability, operating visibility, and repeatable delivery.

Principles

- Objectives must be outcome-oriented.
- Enterprise adoption depends on trust and integration readiness.
- Operational value must survive beyond a demo.

Operating Rules

- Frame objectives in terms of controlled workflows, reduced rework, and improved visibility.
- Connect objectives to future metrics where possible.
- Reject objectives that cannot be governed or verified.

Acceptance Criteria

- Objectives can feed Volume 02 roadmap epics.
- Each objective maps to one or more constitutional principles.
- Objectives are clear enough for acceptance planning.

Version History

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-03 - AI Strategy

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B003

Purpose

Define how AI capabilities should advance the Mariam platform.

Scope

Covers agent roles, model independence, evaluation, prompt governance, and AI-assisted execution.

Principles

- AI strategy prioritizes useful orchestration over novelty.
- Agents should have bounded authority and measurable outputs.
- Model choice should remain replaceable.

Operating Rules

- Separate AI recommendation, drafting, review, and execution responsibilities.
- Capture evaluation criteria for high-impact AI workflows.
- Design for provider portability and fallback.

Acceptance Criteria

- AI roadmap items trace to MAL-V00-B006.
- AI features include evaluation and governance expectations.
- No AI strategy depends on undocumented autonomous authority.

v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-04 - Business Domains

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B004

Purpose

Identify the business domains Mariam may support through governed workflows.

Scope

Covers operations, sales, marketing, finance support, delivery, support, knowledge work, and management workflows.

Principles

- Domains should share platform primitives rather than isolated products.
- Domain expansion must respect enterprise governance.
- Domain workflows should generate reusable knowledge.

Operating Rules

- Add domains through documented specifications.
- Define domain vocabulary before implementation.
- Prefer domain templates that can be audited and customized.

Acceptance Criteria

- Initial domain list supports roadmap planning.
- Domain strategy traces to enterprise and quality principles.
- Future blueprints can define shared primitives.

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-05 - Freelance Ecosystem

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B005

Purpose

Define Mariam's strategic role for freelancers and independent operators.

Scope

Covers profile intelligence, proposal support, delivery workflows, client communication, portfolio memory, and trust.

Principles

- Freelancers need leverage without losing authenticity.
- Work history should become reusable operating memory.
- Client-facing outputs must remain reviewable by the freelancer.

Operating Rules

- Support freelancers with structured workflows, not uncontrolled automation.
- Keep ownership of identity and client communication clear.
- Preserve evidence of work quality and delivery commitments.

Acceptance Criteria

- Freelance strategy can inform marketplace and DNA strategy.
- User trust and review paths are explicit.
- Future modules can support independent work without enterprise assumptions.

Version History

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-06 - Remote Work Ecosystem

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B006

Purpose

Define how Mariam supports distributed teams and remote execution.

Scope

Covers async coordination, handoffs, accountability, knowledge continuity, and operating rhythm.

Principles

- Remote work requires explicit context.
- Async execution depends on durable decisions and clear ownership.
- Coordination tools should reduce status noise.

Operating Rules

- Record decisions, blockers, handoffs, and next actions in structured forms.
- Design workflows for time-zone tolerant collaboration.
- Expose accountability without creating surveillance behavior.

Acceptance Criteria

- Remote strategy traces to governance and quality principles.
- Future workflows can support async review and handoff.
- The system distinguishes accountability from micromanagement.

Version History

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-07 - Marketplace Strategy

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B007

Purpose

Define the strategic shape of future marketplace capabilities.

Scope

Covers supply, demand, trust, matching, service packaging, reputation, and transaction support.

Principles

- Marketplace value depends on trust, fit, and delivery evidence.
- Matching should consider capabilities, context, history, and governance.
- Marketplace growth should reinforce platform knowledge.

Operating Rules

- Do not introduce marketplace behavior before identity, permissions, and quality controls are defined.
- Treat reputation as evidence-based and appealable.
- Keep transaction-sensitive flows auditable.

Acceptance Criteria

- Marketplace roadmap can be staged responsibly.
- Trust and governance requirements are explicit.
- Marketplace strategy aligns with freelance and remote work ecosystems.

Version History

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-08 - Knowledge Strategy

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B008

Purpose

Define how Mariam captures, organizes, retrieves, and improves knowledge.

Scope

Covers knowledge objects, provenance, search, reuse, decay, and governance.

Principles

- Knowledge must be structured enough for reuse and transparent enough for trust.
- Provenance matters as much as content.
- Knowledge should improve through usage and correction.

Operating Rules

- Attach source, owner, freshness, and confidence metadata where needed.
- Avoid treating generated text as verified knowledge.
- Support correction, supersession, and archival states.

Acceptance Criteria

- Knowledge strategy traces to DNA, AI, and quality principles.
- Future specifications can define knowledge object schemas.
- Generated knowledge is clearly distinguished from approved knowledge.

Version History

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-09 - DNA Strategy

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B009

Purpose

Define the strategic use of Mariam DNA for personalization and organizational memory.

Scope

Covers memory layers, consent, preference modeling, behavior patterns, team norms, and adaptive workflows.

Principles

- DNA should improve fit while preserving control.
- Memory must be scoped by user, team, domain, and organization.
- Inferred DNA must remain explainable and correctable.

Operating Rules

- Introduce DNA capabilities through explicit consent and settings.
- Record provenance for important DNA changes.
- Do not let DNA override policy, security, or user intent.

Acceptance Criteria

- DNA strategy traces to MAL-V00-B007.
- Future roadmap can separate personal and enterprise memory.
- Users can understand and correct strategic memory.

Version History

Version	Date	Status	Notes
v1 draft	2026-06-29	Draft	Initial canonical draft for the Mariam Architecture Library.

Book 01-10 - Future Expansion

Version: v1 draft

Status: Draft

Document ID: MAL-V01-B010

Purpose

Define expansion directions that preserve coherence as Mariam grows.

Scope

Covers new domains, integrations, AI capabilities, ecosystem partnerships, and enterprise maturity.

Principles

- Expansion should strengthen the enterprise OS foundation.
- New capabilities should reuse primitives where possible.
- Strategic optionality is protected by modular architecture and documentation discipline.

Operating Rules

- Assess expansion ideas against identity, mission, AI, governance, and security principles.
- Record assumptions and dependencies before roadmap commitment.
- Prefer expansion that compounds knowledge, trust, and operating leverage.

Acceptance Criteria

- Expansion themes can seed future roadmap volumes.
- Strategic risks are visible before implementation.
- Growth remains aligned with long-term strategy.
